EXP 3 SERVLET PROGRAM

AIM:

To create an HTML webpage that displays "Hello World" in the center of the page inside a styled box using CSS for alignment and styling.

ALGORITHM:

- 1. Start
- 2. Create an HTML document with a <head> and <body> section.
- 3. Inside the <head> section:
 - Set the title of the page.
 Add meta tags for character set and viewport settings.
 - o Define CSS styles to center the text and style the box.
- 4. In the <body> section:
 - o Use a <div> element with a class box to wrap the text.
 - o Inside the <div>, add an <h1> tag with the text "Hello World" in bold.
- 5. Use **CSS** Flexbox to center the box both vertically and horizontally.
- 6. Apply styles to the box, including:
 - $\circ \quad \text{Padding} \circ \quad \text{Border} \circ \quad \quad \text{Border-radius} \circ \quad \quad \text{Box-shadow} \circ \\ \quad \quad \text{Background color}$
- 7. Save the file and open it in a web browser.
- 8. End.

PROGRAM:

```
<!DOCTYPE html>
<html>
<head>
<title>hello world</title>
<meta charset="UTF-8">
<meta name="viewport" content="width=device-width, initial-scale=1.0">
<style>
body {
    display: flex;
    justify-content: center;
    align-items: center;
```

```
height: 100vh;
   margin: 0;
   background-color: #f0f0f0;
  }
  .box {
   padding: 20px;
   background-color: white;
   border: 2px solid black;
   border-radius: 10px;
   box-shadow: 5px 5px 15px rgba(0, 0, 0, 0.2);
   text-align: center;
  }
 </style>
</head>
<body>
 <div class="box">
  <h1><b>HELLO! THIS IS KAVIYAM...</b></h1>
 </div>
</body>
</html>
```

Output: HELLO! THIS IS KAVIYAM...

RESULT: Thus the servlet program was successfully executed.
